

STATE EMPLOYEE PURCHASE PROGRAM FOR PERSONAL COMPUTERS, SOFTWARE, AND ACCESSORIES

The State of Missouri has established an employee purchase program with Dell, HP, and Lenovo to allow state employees to purchase computers, software, and accessories at discounted rates. Each manufacturer is providing discounted pricing for a variety of products available on their state employee website. The manufacturers' state employee websites can be accessed through World Wide Technology's (the state's PC Prime Vendor contractor) website. To gain access to the manufacturers' employee purchase programs, please register (at bottom of e-store login area) at www.wwt.com/missouri. While registering you will be asked to provide the following partner code: SOMST0303. After receiving an email confirmation of your registration, you may login through the same website to access the manufacturers' links that are provided under "State of Missouri Employee Purchase Program." If you have questions regarding the registration process, please contact Lynda Terranova with World Wide Technology at (314) 301-2566 or Lynda.Terranova@wwt.com.
